

XtendaPole – *Extend Your Reach*

XtendaPole is a high quality extension pole, designed for vibration analysts, by vibration analysts, to reach awkward or inaccessible vibration measurement points, safely and quickly.

Features

- Patented head assembly for quick and easy adjustment – spring loaded adjustment pin supports 5 sensor angles; adjustable head supports a variety of common sized vibration sensors **
- Anodized head finish for long lasting service
- Light weight head – 5.6 oz
- Positive lock for safe pole extension
- Non-conductive fiberglass handle for operator safety
- Cable management system for safe, easy cable placement

TO ORDER: In North America, call 1-800-778-3428; outside of North America, call 1-613-608-0464
