

UltraMet Plus+™

Versatile ultrasonic PD measurement tool.

A highly sensitive ultrasonic listening device, which provides instant indications of levels of surface PD activity, in the form of decibel readings AND audible sound.

PRODUCT CODE: UMP1

Benefits

- Gather and record detailed data on PD activity in multiple assets.
- Measure changes in activity over time.
- Identify need for further condition assessment or maintenance intervention.
- UltraDish™ option for even greater versatility.

Fact: 85% of disruptive failures in HV/MV assets are PD-related.

Fact: The UltraMet+™ is a highly effective tool for quantifying ultrasonic PD activity.

Features

- Take multiple decibel readings of PD activity.
- Listen for PD activity over headphones.
- Compare levels between faulty and fault-free equipment.
- Kit includes headphones, battery charger and case.

Accessories and options

UltraDish™ - Parabolic Waveform Concentrator investigates PD activity in overhead assets or at a distance.

Flexible Sensor™ - Plug-in flexible microphone extension enables you to probe enclosures and tight spaces.

Calibration Service - we recommend regular calibration of the UltraMet Plus+™ in our factory.
