BUILD A TRAINING PROGRAM THAT BEST MEETS YOUR INDIVIDUAL NEEDS

Start at a level based on your experience and/or instrument platform; Finish at a level that meets your objectives.

Vibration Awareness (1-Day)

- Ideally suited for those new to vibration technology or for a formal refresher
- Course covers the basics of vibration theory, proper measurement and the value of a properly executed program
- Course is the foundation on which all other courses are built on – a certificate of attendance is provided

Route Management & Trending (1-Day)

- Ideally suited for those with some basic understanding of vibration technology
- Course covers vibration system setup, channel configuration and basic trending and alarming techniques
- Technikon STD-500Pro or STD-510, and VibroDesigner Level 1 software platforms are used for examples

Vibration Diagnostic Techniques (1-Day)

- Ideally suited for those with some solid experience in vibration technology, and/or completed VibroDesigner 1 training
- Course covers more advance analytical techniques built around time wave and spectrum analysis
- Technikon STD-500Pro or STD-510 and VibroDesigner Level 2 software platforms are used as examples

Post Training Mentoring (an interactive 12-Month support service)

- For vibration programs early in deployment and/or supporting a lot of assets, some being very complex
- Program provides phone and email support to help solve your critical machine problems
- Technical notes on experiences and success are shared with all mentoring participants, allowing members to build an extensive library of machine issues and how to effectively address them

Prep for CAT 1 Certification & Exam (an interactive 12 month internet course)

- Builds on Vibration Awareness, Route Management & Trending and Diagnostic Technique classes
- Covers typical machine diagnostic procedures and machine data analysis
- Multi-module program integrating hands on activities, along with ongoing training and testing to prepares participant for CAT 1 Exam

TO REGISTER

For answers to your training questions or to register for one of our classes:
